## Resistor Trimming and Microvia Drilling in the Medical Device Industry

Printed circuit boards to support complex controllers and sensors have become commonplace in the medical field. With advances in technology, medical diagnostics, research and treatment methods have become computerized, making high density PCBs and intelligent sensors for medical equipment a standard requirement. [Read more...](#)

RapiTrim - The Future of Resistor Trimming™

## PPI Systems Support

At PPI Systems we pride ourselves on our outstanding customer support for resistor trimming and drilling systems. Our technical support group consists of individuals with varied backgrounds and skill levels, allowing us to tap into a broad spectrum of expertise. In addition to our people and unique skills, we use a variety of tools to offer you exceptional support.

## PPI Systems Laser Processing Application Lab

Where Efficient and Intelligent Solutions Come to Life in Collaboration with Our Customers

PPI's main 3500 sq. ft. application lab offers an outstanding array of services for both laser drilling and resistor trimming customers. Our highly trained technical team have a deep understanding of laser processing with over 100 years of combined experience providing solutions to customers.

## Events

**International Microwave Symposium**  
San Diego, CA  
June 11-16, 2023

**FIEE, 2023**  
Sao Paulo, Brazil  
July 18-21, 2023

**EuMW 2023**  
Berlin, Germany  
Sept. 17-22, 2023
